MYTHOS STS SUPERTOWER®

with Built-In Powered Subwoofer

Miraculous Performance, Stunning Elegance

No Compromise Sonic Delight

For music and movie lovers who want audiophile-grade performance and drop-dead gorgeous looks from their loudspeakers, we offer the new Mythos STS — the smaller and more affordable sibling of the Mythos ST, the most critically acclaimed loudspeaker of 2007 — a speaker that *The Perfect Vision* magazine referred to as “Pure magic ... the Definitives will treat you to rare sonic delights you may never have experienced before” and *Home Theater* magazine called “a loudspeaker that exudes power and class ... the floorstanding loudspeaker that I’d recommend you buy.”

The Mythos STS combines a high-definition mid/high frequency monitor section with an integrated SuperCube® powered subwoofer for no-compromise sonic performance. With the Mythos STS there is no longer a need to find room for and run wires to a separate subwoofer to get the full visceral impact from your favorite music and movies. The STS can do it all.

Exquisite Styling and Build Quality

Like the rest of the award-winning Mythos Series, the STS boasts slim, space-efficient, modern design that perfectly complements today’s sleek video monitors. In order to make the Mythos STS an aesthetic enhancement for any room, we spared no expense or effort on design, fit and finish details. The extruded Aluminum enclosure is anodized (both silver and black finishes are offered) and hand-polished to a pearlescent sheen. The base is solid granite for both greater stability and a richer more elegant look. All of the Mythos STS styling emanates from a parabolic form, grounded as much in technical appropriateness as visual beauty. With emphasis on a narrow, deep column, the parabolic theme is repeated in the lines of the cap and granite base. There is an unabashed acknowledgement of classic “American Streamline” principles in the STS, communicating motion, direction and clean utility. Your decorator will be jealous.

“Breathtaking sound quality puts many higher-priced systems to shame”

— *The Perfect Vision Magazine* 2007 review of the original Mythos ST

MYTHOS STS SUPERTOWER®

State of the Art Definitive Technology

Each Mythos STS contains a D'Appolito array consisting of two high-definition 4 $\frac{1}{2}$ " drivers surrounding a 1" dome tweeter housed in an acoustically isolated sealed enclosure. The drivers feature Definitive's patent-pending Balanced Dual Surround System (BDSS) technology that supports the speaker cone at both the inner and outer edges for longer, more linear excursion, greater clarity and finely textured inner detail. The tweeter is a pure aluminum dome, which has been heat-treated to relax the crystal structure and then coated with a ceramic to produce extended highs that reveal nuance and shimmer without a trace of edginess. The slim, curved shape of the enclosure reduces diffraction contributing to the STS's remarkable imaging that is truly startling in its ability to float utterly lifelike highly defined sonic images across a broad and deep soundstage.

The subwoofer is built around a 5" x 10" racetrack-shaped polymer/carbon composite cone driver powered by a built-in 300-Watt digital amplifier and pressure-coupled to two 5" x 10" racetrack-shaped planar low-bass radiators for a total bass radiating area greater than a 12" woofer. A pair of STSs is like having two 12", 300-Watt powered subwoofers in your room without taking up all the floor space. The result is bass that is deep, powerful and impactful while at the same time having the kind of tight, controlled and accurate response of the finest and costliest audiophile speakers.

The Sound Will Amaze You

We could write adjectives all day long in an attempt to describe just how good the Mythos STS sounds and we would fall far short of capturing the experience. If you are a true music lover, you need to hear them for yourself to discover just how lifelike a pair of speakers can sound. You'll hear depth and nuance to your music you have never heard before (unless you own a pair of speakers several times the cost of the STS). You will marvel at the dynamic impact and sheer bass power when watching movies, amazed that all that power is coming from just two small towers without a separate subwoofer. Yes, you will be astonished.

Mythos STS's Advanced Driver Technology

New high-definition drivers incorporate our Balanced Double Surround System (BDSS) technology (patent-pending).

Mythos STS's new generation tweeter incorporates a new voice coil, a new annealed dome, a new surround and a special acoustically contoured faceplate.

The STS's built-in 300-Watt powered subs incorporate Definitive's new racetrack-shaped carbon composite driver coupled to two planar low-bass radiators.

STS SPECS & SYSTEM

MYTHOS STS SUPERTOWER SPECIFICATIONS

Dimensions: 5 $\frac{1}{2}$ " W x 8 $\frac{1}{2}$ " D x 47 $\frac{1}{2}$ " H (height includes granite base & leveling feet/spikes)

Base Dimensions: 10 $\frac{1}{2}$ " W x 14" D

Frequency Response: 16 Hz – 30 kHz

Efficiency: 93 dB

Nominal Impedance: 4 – 8 ohms

Driver Complement:

- Two 4 $\frac{1}{2}$ " high-definition cast-magnesium basket midrange drivers.
- One 1" (25 mm) pure aluminum dome tweeter.
- One 5" x 10" long-throw racetrack subwoofer coupled to two 5" x 10" racetrack low bass radiators.

Rec. Assoc. Amplification: 20 – 350 Watt/channel

Built-In Subwoofer Power Amplifier: 300-Watt Digitally-Coupled Class D amplifier

Finish: gloss Black or brushed Aluminum

MYTHOS STS SUPERTOWER SYSTEM

Create the perfect Mythos STS home theater system by adding a Mythos Ten Center channel and a pair of Gem XL surrounds.
